

Spa Cover Features

(Clicking on a link below will open a small window with extensive information and illustrations. If you prefer all the info on a single page, [click here](#))

- A full 6" to 4" thick [tapered foam!](#)

Roberts Extreme Spa Covers are some of the thickest, most insulating spa covers made. A full 6" thick foam core provides not only additional insulation value, but added strength as well.

- High insulating [R-value](#) !

With the standard 1 pound density foam cores, **Roberts Extreme Spa Covers** have a minimum R value of R-21. The optional 1-1/2 pound density foam achieves an even higher R-value!

- Reinforcing metal [C-channel](#)!

The foam cores are further strengthened with a full **20 gauge**, 2½" wide C-channel running the entire length of the cover.

- [6 mil vapor](#) barrier!

The vapor barrier surrounding the foam is the most important aspect in protecting the cores from absorbing water. Not only is the vapor barrier of **Roberts Extreme Spa Cover's** the thickest, but the option of adding a second layer make it the most protective!

- Optional [continuous hinge seal](#) !

Rather than just "fingers" or "steam sealers" that seal the very ends on the hinge, **Roberts Extreme Spa Covers** have an optional insulating flap running the **entire** length of the hinge!

- The heaviest and most durable [vinyl](#)!

With a weight of **30oz.** (per lineal yard), the vinyl of **Roberts Extreme Spa Covers** is the heaviest available. It also exceeds the specifications of "Marine Grade Vinyl", **and** "Premium Grade Vinyl".

- Continuous one-piece reinforced [hinge](#)!

Roberts Extreme Spa Covers solid one piece, multiple layered hinge is optionally reinforced with nylon webbing making it the strongest part of the cover!

- Large corrosion proof [zippers](#)!

Roberts Extreme Spa Covers use large teeth zippers designed to maintain their "zipping" ability for years.

- Super strong reinforced [tie-down straps](#) !

With so many covers in areas of high winds, **Roberts Extreme Spa Covers** use exceptionally strong nylon webbing for the tie-downs. These are the strongest tie-downs possible.

- Gusseted, double stitched [skirt](#)!

Expertly designed to protect the outer edge of your spa, the skirt of **Roberts Extreme Spa Covers** are also strong enough to lift the cover!

- Heavy duty [handles](#)!

Made of 1-1/2" wide nylon webbing these reinforced handles are the strongest possible.

- Double laminated polyester [scrim](#) underside.

12oz double laminated, tight mesh reinforced, chemical and ozone resistant scrim underside. Optional Reflex Energy Shield adds even more insulating ability!

- **Moisture drains!**
Specifically located to prevent water from accumulating inside the cover, and designed to not scratch the spa when the cover is removed.
- **Color matched [thread](#)!**
The thread used in **Roberts Extreme Spa Covers** is a 93#, UV resistant, bonded, Dacron Polyester thread. Covers are completely double stitched and this thread will not mildew or rot, nor will sunlight degrade it over time.
- **A multitude of [colors](#) too choose from!**
- **Meets or exceeds [ASTM F1346-91](#) standards!**
Roberts Extreme Spa Covers meet or exceed all aspects of ASTM F1346-91 for a Manual Spa Safely Cover.
- **Four year [warranty](#)!**
Roberts Extreme Spa Covers four year warranty is one of the most comprehensive warranties in the industry.
