Assembly Instructions for The Vignette Settee.

Thank you for purchasing Old-Growth Again patio furniture. OGA is dedicated to restoration forestry. Patio furniture sales finance our restoration work in our California Redwood forestlands.

Tools required: 1/2-inch ratchet and a mallet or small hammer.

The Settee ships in 12 parts: 2 back rests, 1 tabletop, 2 legs with armrests, 2 back supports, 2 independent legs, a central union 2x6, and an optional support piece under the tabletop for the optional umbrella hole. 32 - 3 1/2" long stainless steel carriage bolts with washers and nuts are included to assemble your set.

The Settee parts attach with carriage bolts. All parts have numbers written next to pre-drilled holes. Just match up the numbers. For example, an armrest with the number 9 next to a pre-drilled hole is to be attached to the backrest with the same number, the opposite part will be marked with an X.

Your settee was fully assembled before being broken down for shipping. All the parts fit. Gently tap the bolts all the way into the wood (to set in place) then add a washer and lightly tighten. Do not over tighten or you'll crush the wood and weaken the structural strength of your set. If you are forcing a bolt into place, you either have the wrong part or it is not aligned or it is turned around.

2

Place your parts on a level clean surface. If you take a few minutes to lay all the parts out as shown above the assembly will be simple and be accomplished in less time.

Photo 1: Take the base of the seat and its leg with armrest, and attach the parts with 4 bolts as shown in photo 1. Assemble each front leg and the back support for the same seat with 2 bolts each.

Photo 2: Repeat the steps above for the second seat.
