

LC200C Ceiling Mount for Monitors up to 32" with up to 200mm VESA® Patterns

Follow the directions provided by the monitor manufacturer to expose the VESA® mounting pattern of threaded inserts on the back of the monitor. Attach the VESA® Plate to the monitor with Monitor Attaching Screws specified by the monitor manufacturer. Several screw sizes are provided for convenience.

Predetermine the best possible viewing location for the monitor allowing for tilt and pivot action. Use the LC200C Ceiling Flange as a template to mark and drill pilot holes 2-1/3" deep into the wood ceiling joist using a 1/8" bit for each of the lag screw locations.

Attach the LC200C Ceiling Flange to the ceiling wood joist using the provided Lag Screws. If mounting into concrete, metal beams or at an angle, contact Lucasey for ceiling mount accessories compatible with this mount.

Attach the LC200C Flange Cover to the LC200C Ceiling Flange using the provided countersunk screws.

Carefully slide the Inside Adjustable Pipe, with attached monitor, into the Outside Pipe. Adjust to the appropriate length (Do not adjust past the red line) and tighten the Setscrews.

If desired, run the monitor cords through the pipes using the Cord Access Hole at the top and the hole in the bottom of the Inside Adjustable Pipe.

Screw the Outside Pipe, with attached monitor, into the LC200C Ceiling Flange.

Double check to make sure all fasteners, including the adjustable pipe setscrews, are secure and tight.
